Subject: **Media inquiry re Spraying operations by a U.S. Military Stratotanker in Sherbrooke, Quebec on 2024-02-27**

Hello,

I am an independent journalist based in Quebec who has corresponded with you before for my series articles on Geoengineering and Weather Modification in Canada (ref. <https://fournier.substack.com/p/special-investigation-geoengineering>).

I am currently writing the fourth and final part of this series for which my **publishing target deadline is March 12.**

Today, I witness, photographed, and shot video of a **suspicious U.S. Military Boeing KC35R (KC-135R/T) Stratotanker conducting a spraying operation over my city of Sherbrooke Quebec at around 12:07 pm.**

Please consult the following folder online for **images** taken of the spraying and information I photographed from two separate flight-tracking software (globe.adsbexchange.com – which includes military flights, and www.flightaware.com):

http://liberty-academy.org/geoengineering/photos/Canada/Quebec/Sherbrooke/2024/02-27-US_Military_Stratotanker_Spraying/

Note that globe.adsbexchange.com does track military flights and also indicated that there was no callsign assigned to this particular flight.

I also shot two videos of this particular flight:

http://liberty-academy.org/geoengineering/videos/2024-02-27-Sherbrooke-US_Military_Stratotanker/

I believe that the Department of National Defence should be made aware if military flights from other countries are conducting operations in Canadian skies.

As such, were you aware of this particular flight? And if so, can you provide the following details about it?

- the person(s) or party from who were responsible for approving this military flight over Canadian territory;
- whether the Department of National Defence was aware of this flight and if so, by which party you were informed;
- the purpose of this flight operation (cloud seeding, SAI, SRM, military exercise, or other);
- whether this aircraft was flying with its transponder on or not;
- what substances were sprayed from this aircraft into our atmosphere;
- a safety report of the inspection and/or approval of the dispersion of substances used for this spraying operation;
- which specific company or military organisation this aircraft belongs to;
- whether this U.S. military aircraft has conducted other flight operations in Canada this year.

Note that I have also sent a separate media inquiry to Transport Canada regarding the approval of this flight, as they are the regulator.

Note that for increased transparency and accountability for all Canadians, this letter, along with the related photographs and videos, will be made available in my article for all viewers to see, along with your response should it be forthcoming.

Awaiting your kind and timely reply.

Thank you.

Respectfully,

Dan Fournier, Independent Investigative Journalist,
Associate member of the Canadian Association of Journalists (CAJ) & New Canadian Media (NCM)
